1.9.2 Engine and APU Maintenance (B Rating)

- AIESL can carry out maintenance under Category B class rating on the uninstalled Engine and/or APU (Auxiliary Power Unit) and Engine and/or APU components in accordance with Engine and/or APU maintenance data or, if agreed by the DGCA, in accordance with component maintenance data only whilst such components are fitted to the Engine and/or APU.
- Nevertheless, AIESL may temporarily remove a component, in order to improve access to that component, in accordance with the procedure outlined in MOE Chapter 2.16.2, except when its removal generates the need for additional maintenance that AIESL is not approved for.
- The limitation section will specify the scope of such maintenance thereby indicating the extent of approval.
- AIESL may also carry out maintenance on an installed engine during 'base' and 'line' maintenance in accordance with MOE Chapter 2.31.
- Under B rating, AIESL has both Engine and APU maintenance capabilities at different bases/ stations as detailed below:

1.9.2.1 Engine Maintenance (B1 Rating)

1.9.3 Component Maintenance (C Rating)

- Category C class rating - Carrying out maintenance on uninstalled components (excluding Engines and APUs) intended for fitment to the aircraft or engine/ APU.
- The limitation section will specify the scope of such maintenance thereby indicating the extent of approval.
- AIESL may also carry out maintenance on an installed component during base and line maintenance or at an engine/ APU maintenance facility in accordance with the procedures outlined in MOE Chapter 2.31.
- Under C rating, AIESL has capabilities at different bases/ stations as detailed below:

1.9.4 Specialized Services Maintenance

- Category D class rating is a self-contained class rating not necessarily related to a specific aircraft, engine or other component.
- AIESL may carry out NDT as a particular task for another organization under its D1-NDT rating approval for processes listed below in MOE Chapter 1.9.4.1, in accordance with procedure outlined in MOE Chapter 2.31.3.

1.9.4.1 NDT with D1 Rating

RATING	LIMITATION	LOCATION						DETAILS OF LIMITATION
		BOM	DEL	CCU	HYD	NAG	TRV	
D1	Liquid Penetrant (PT)	X	X	X	X	X	X	IN ACCORDANCE WITH AIESL NDT-WRITTEN PRACTICES MANUAL
	Magnetic Particle (MT)	X	X	X	X	X	X	
	Eddy Current (ET)	X	X	X	X	X	X	
	Ultrasonic (UT)	X	X	X	X	X		
	Radiography (RT)	X	X	X		X		

1.9.4.2 NDT Without D1 Rating (in the course of maintenance)

When AIESL intends to perform NDT tasks under another approved rating (e.g., as part of the maintenance carried out on aircraft under rating A1, engines under rating Bx, components under C rating) the NDT tasks are considered done in the “course of maintenance”.

Following NDT methods can be performed during “course of maintenance” on aircraft, engines and components at AIESL:

- 1) Liquid Penetrant (PT)
- 2) Magnetic Particle (MT)
- 3) Eddy current (ET)
- 4) Ultrasonic (UT)
- 5) Radiography (RT)
- 6) Thermography Testing (IRT)
